Authorized Permit Agent Form (ONE FORM PER PERMIT)

This form may be used by a qualifying agent to designate an individual to obtain a permit on his/her behalf for a project for the qualifying company. The contractor should submit an original Authorized Permit Agent Form for each project for which he/she has designated an individual to pull permits. This designated individual shall further be identified as the authorized permit agent. This notarized form with an **ORIGINAL SIGNATURE (no copies or faxes accepted)**, a copy of the contractor's license, a copy of the contractor's company license, and a copy of the driver's license of the authorized permit agent is to be given to the permit office in the city or county in which the project is located. **DO NOT SEND A COPY OF THIS FORM TO THE BOARD OFFICE UNLESS REQUESTED.**

License verification by permitting office should be completed by visiting <http://verify.sos.ga.gov/verification>

| | |

Residential Plan Review Verification Form

Please fill out the following information completely. You must provide the Project Review Number as well as the Model Name and/or Number.

Project Information:

Address: _____ Lot #: _____

Model name and/or number to be built: _____

Has this model already been approved through plan review?: (Y) (N)

If yes, what is the approved Project Review number? (This # begins with BPR): _____

Are there any modifications for this project/address from the original approved plans? (Y) (N)

If yes, provide the scope and any details and drawings of the modification.

Square Feet: _____ Number of Stories: _____

Basement?: (Y) (N) If yes, is the basement finished?: (Y) (N)

Deck?: (Y) (N) If yes, what is the square footage of the deck?: _____

Contractor Information:

Contractor/Builder Name: _____

Contact Name: _____

Phone #: _____ Fax #: _____

Business License #: _____ Expiration: _____

State License #: _____ Expiration: _____

Street Address: _____

City/State/Zip: _____

As can be seen in Table 404.1.1b of the code, the minimum required foundation wall thickness for those applications which do not require design is 8 inches (203 mm). Footnote 2 permits a reduction in wall thickness to 6 inches (152 mm) as long as the reinforcing steel closer to the inside face of the wall, the effective depth of the wall element which resists bending is increased; therefore, the flexural capacity of the wall is increased. Placement of the reinforcement to achieve this reduction in wall thickness is shown in Figure 404.1.1c.

Figure 404.1.1c

PLACEMENT OF REINFORCEMENT IN 6 INCH FOUNDATION WALLS

For S1: 1 INCH = 25.4 MM

404.1.3 Backfill. A minimum distance above adjacent grade to which the foundation must be extended is necessary to provide termite protection and minimize the chance of decay resulting from moisture migrating to the wood framing. A reduced foundation extension is permitted when veneer is used.

SEWER TAPS REQUIRE A PLUMBING APPLICATION AND SHOULD BE INSTALLED BY A LICENSED PLUMBER OR LICENSED UTILITY CONTRACTOR. PLEASE CALL FOR A SEWER TAP INSPECTION.

REFER TO THE DETAIL #1 BELOW. PLEASE PAY CLOSE ATTENTION TO THE REQUIREMENTS AS SPECIFIED BY THE CITY OF CANTON BUILDING INSPECTIONS DEPARTMENT.

To: All Builders
Re: Warming Fire

As per Georgia Department of Natural Resources Environmental Protection Division Air Protection Branch, Chapter 391-3-1:

Open burning is only allowed at construction sites if the following items are met:

1. Prevailing winds at the time of the burning are away from the major portion of the area's population.
2. The location of the burning is at least 1,000 feet from any occupied structure, or lesser distance if approved by the Fire Department.
3. Heavy oils, asphalt materials, items containing natural or synthetic rubber or any materials other than plant growth are not burned.
4. Warming fires shall be in a non-combustible container and meet the above requirements.

If you have any questions, please call the Canton Building & Safety Services at 770-704-0100.

Temporary Construction Power Tampering/Modification Form

Field modification and/or tampering with an approved temporary electrical service that results in the exposure of live parts is a code violation and shall be dealt with accordingly.

If City of Canton personnel discover a temporary construction power service that has been modified or tampered with in any way and is being utilized in an unsafe manner, immediate disconnection will result.

Date

City of Canton
Soil Erosion and Sedimentation Control Agreement

No inspections will be made if site is not in compliance. Notice of non-compliance will be issued followed by court citation if corrections are not made within three (3) working days. Reinspections fees will be assessed for each follow up inspection and doubled until permit revoked.

General Notes

1. The construction pad shall be maintained in a condition which will prevent tracking or flow of mud on public streets.
2. Silt fences and hay bale barriers shall be cleaned or replaced and maintained in functional condition until permanent erosion control measures are established.
3. Silt fence fabric shall be comprised of GA Department of Transportation qualified products listed 36, for silt fence fabric.
4. All grassing shall be in accordance with Chapter 6, Section III "Vegetative Practices" of the Manual for Erosion and Sediment Control in Georgia.
5. All other work shall be performed in accordance with the same manual.
6. The contractor shall furnish the City of Canton with a schedule of anticipated starting and completion dates.
7. Erosion control devices will be in place before site disturbance and will be periodically inspected and repaired or restored as needed to function properly until permanent measures are established and project is completed, i.e.: construction exists and silt fences shall be retopped or cleaned as silt reduces their effectiveness.
8. Any additional construction other than shown on the original plan will require separate and additional soil erosion and sediment control measures and approval.
9. Temporary vegetation (grass seed & Straw) and/or heavy mulch will be used to stabilize all Disturbed areas except the footprint of structure and construction entrance. In no case shall a site be left bare for more than fourteen (14) days of clearing.
10. All stockpiles shall be covered with plastic or temporary vegetation until such stockpiles are replaced or removed.
11. All disturbed areas will be permanently landscaped and grassed as quickly as possible.
12. All work shall be performed in accordance with the specifications of the Manual for Erosion and Sediment: control in Georgia.
13. Additional measures may be required to control erosion as determined necessary by the City Inspector.

Person responsible for erosion control measures is;

Name

Emergency Phone Number

Georgia Energy Code Compliance Certificate

A certificate shall be readily accessible and posted on the electrical distribution panel or air handler.

List primary type when there is more than one value for each component (i.e. certificate shall list the value covering the largest area). The certificate shall be completed by the builder or registered design professional.
